Smartphone Body Camera

Any Android smartphone can be used as a Body Worn Camera. Many Android smartphones are ruggedized, making them ideal devices for law enforcement agencies.

Certain Devices Include:

- Single Button Activation
- Military Grade Durability (MIL-STD-810G)
- Waterproof/Dustproof (IP 68)
- Wide-Angle Lens
- Long-Lasting Battery
- HD Video Quality

Numerous Mounting Options

Automatic Activation Options

Automatic Injury Detection (AID)

AID body armor insert can detect a gunshot or stabbing. An alert can be sent to dispatch. Visual Labs recording is started.

Speed Threshold

When an officer exceeds a designated speed, a Visual Labs BWC recording is started.

Holster Activation

Bluetooth module attached to a gun holster can detect when the gun is drawn. A Visual Labs BWC recording is started.
